

PRASANTH MURUGAN

Technical Delivery Professional · Senior Software & Data Engineer · Backend Systems Specialist
Birmingham, UK (Open to Relocate) · +44 07553000627 · prasanthmurugan032@gmail.com · [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Technical Delivery Professional with 5 years of experience coordinating end-to-end delivery of complex technical solutions in enterprise and financial environments. Skilled in delivery planning, scope and dependency management, stakeholder management, risk and issue management, and driving projects to completion on time and within budget. Strong background in backend systems, cloud-native infrastructure (AWS, GCP), and CI/CD pipelines, underpinned by a rigorous Agile/Scrum approach. Proven ability to collaborate across cross-functional teams, manage production incidents (L2/L3), and apply data-driven insight to support decision-making and continuous improvement. Commercially aware and adaptable, with strong communication skills and a track record of delivering high-quality outcomes in regulated, 24/7 environments.

CORE COMPETENCIES

Delivery Planning	End-to-end project coordination, scheduling, milestones, progress tracking, and reporting
Scope & Dependency Mgmt	Requirements gathering, change management, scope definition, dependency mapping
Risk & Issue Management	Risk identification, root cause analysis (L2/L3), escalation, SLA-bound resolution
Stakeholder Management	Cross-functional collaboration with product owners, QA, frontend, and third parties
Budgeting & Financials	Budget tracking, financial forecasting, cost-conscious delivery across dev/staging/prod
Governance & Compliance	SDLC standards, audit compliance, CI/CD controls, policy adherence in regulated environments
Infrastructure & Networking	AWS (Lambda, S3, RDS, EC2), GCP (Cloud Run, BigQuery), Docker, Kubernetes, Terraform
Languages & Frameworks	Python, Java, Spring Boot, SQL, C#.NET, REST APIs, Microservices, Event-Driven Architecture
Data & Analytics	ETL/ELT pipelines, SQL optimisation, data quality frameworks, BigQuery, MongoDB, PostgreSQL
Engineering Practices	Agile/Scrum, TDD, CI/CD (GitLab, GitHub Actions), JIRA, ServiceNow, Git

WORK EXPERIENCE

Development Team Member | Synergi Design

Birmingham, UK · July 2024 – Present

- Coordinated end-to-end delivery of scalable backend microservices (Java/Spring Boot, C#.NET) supporting enterprise web and Android applications, ensuring timely delivery against scope, quality criteria, and production SLAs.
- Managed scope, dependencies, and delivery plans for ETL/ELT data pipeline projects, tracking progress, risks, and changes across dev/staging/prod environments to ensure high-quality outcomes.
- Led SQL performance analysis and query optimisation initiatives, improving transactional and reporting workflows by ~40%; documented findings and recommendations as part of structured delivery governance.
- Managed CI/CD pipelines (GitLab, Docker, Kubernetes) with rigorous change controls, supporting automated and reliable deployments aligned with project schedules and release plans.

- Provided L2/L3 production support across a 24/7 environment: conducted root-cause analysis (RCA), resolved critical incidents within SLA timelines, and produced formal incident reports for stakeholders.
- Collaborated with product owners, QA engineers, and frontend developers in Agile/Scrum ceremonies; tracked action items, risks, and dependencies in JIRA and maintained clear progress reporting.
- Mentored junior engineers on coding standards, testing practices, and delivery best practices, contributing to team capability and continuous improvement.
- Worked with AWS-hosted infrastructure (Lambda, S3, RDS), supporting cloud deployments, monitoring, alerting, and production reliability as part of the delivery lifecycle.

Senior System Engineer | Infosys Limited

Bangalore, India · July 2021 – December 2023

- Delivered 30+ enterprise components to strict SDLC, audit, and compliance standards in a highly regulated environment, managing scope, deliverables, and cross-system dependencies throughout.
- Designed and implemented ETL-style data transformation workflows enabling reliable cross-system data exchange; supported enterprise reporting and governance requirements with robust data quality validation.
- Led unit testing, regression testing, and UAT coordination for production-critical releases; championed TDD principles and supported post-deployment validation and incident resolution across global environments.
- Performed SQL tuning and performance optimisation for high-volume transactional systems, reducing query execution time by up to 35% and documenting improvements for stakeholder reporting.
- Coordinated production deployments and post-deployment checks across international environments, managing timelines, risks, and change communications with cross-functional teams.
- Mentored junior engineers on clean coding, debugging, testing, and performance optimisation; contributed to process improvement and best-practice knowledge sharing across the team.

Programmer Analyst | FinAGG Technologies Pvt Ltd

Chennai, India · January 2021 – July 2021

- Built Java Spring Boot REST APIs supporting SME loan calculation workflows for 10,000+ active users; coordinated delivery of secure transactional backend services with robust validation and error handling.
- Supported data services for financial reporting, operational dashboards, and automated notification pipelines (email/SMS), contributing to end-to-end delivery of business-critical features.

KEY PROJECTS & ACHIEVEMENTS

Customer Service Performance Evaluation – Machine Learning

- Analysed 85,000+ customer records to identify CSAT drivers using Logistic Regression, Random Forest, and XGBoost; achieved 90% model accuracy. Applied NLP-based sentiment analysis to inform retention strategies — demonstrating data-driven insight in decision making.

Accident Severity Prediction – Predictive Analytics

- Built predictive models on 100,000+ records to assess accident severity and risk exposure; applied feature engineering and model evaluation to support insurance decision-making.

YouTube Transcript Summarisation using Claude

- Developed an LLM-based transcript summarisation tool using Anthropic Claude API to generate concise and structured summaries from YouTube transcripts, implementing API integration, prompt engineering, response processing, and prompt optimisation to improve output quality and relevance.

Achievements

- Winner, Aston Global Advantage Competition (Aston University) – secured internship at St. Basils.
- Winner, Future Tech Pitch at Birmingham Tech Week – awarded cash prize.

EDUCATION

MSc Business Analytics · Merit

Aston University, Birmingham, UK · Jan 2024 – Jan 2025

Modules: Big Data for Decision Making, Performance Analytics, Software Analytics, Data Mining & Web Analytics, Descriptive Analytics

BEng Automobile Engineering · First Class Anna University – MIT Campus, India · Aug 2016 – Sep 2020
